In a world called Inamorta, you're surrounded by discriminate nations devoted to their individual nations technology and struggle for dominance. Each nation has developed its own unique way to defend and attack. Proud of their unique craft they have become obsessed to the point of worship, turning weapons to religion. Each believes that their way of life is the only way, and are dedicated to teaching their policies to all other nations through what their leaders claim as divine intervention, or as you will know it... war. The others are known as: "Archidons", "Swordwrath", "Magikill", and "Speartons". You are the leader of the nation called "Order", your way is of peace and knowledge, your people do not worship their weapons as gods. This makes you a mark for infiltration by the surrounding nations. Your only chance to defend is to attack first, and obtain the technologies from each nation along the way. Sep 13, 2022 Version 2022.1.32 Archidon small speed buff New and updated missions! So I have a really interesting idea to make a second campaign like stick war 2 to make it adapted to you can get all the same units you already on locked and the way to unlock the second campaign is through beating the first campaign on insane and even though That and this next idea might take a lot of time for your busy crew a sandbox mode would be GREAT where once you have got all the skins and completed all the campaign levels as well as buying all the items in the store at least once I feel like that would make your company a lot of money to have that kinda of goal for players to get where they can essentially make their own level and see who would win star level six boss or desert boss or 1 golden speartons with 10 metrics vs a giant zombies speartons. I never actually beat the final level of stick war two and don't remember much from it but another option for giants making them have the rock throwing ability for extra gold would be awesome too, the praying thing is kinda unnecessary though you can leave that out of you want :) I grew up with the og stick war and love it so much but there is one thing I have original, 3 upgrade points to unlock a drill for gold that will automatically completely mine the first gold thing and give half the gold that a minor could have gotten while completely taking out that part of the mine. I don't actually recommend trying my crazy ideas but they could be interesting I love this game and I am the biggest fan of this game but I think these things will make the game a lot better! First thing I want yall to do is add new units, the first one I want you to add is the enslaved giant from stick empires, but you can't complete a level to unlock it, its cost is 1500, and its space in the stick amount is 4, also it needs skins too, every unit I tell you to add needs skins, next unit is the legendary warrior wrath, it is a swordwrath that has 2 ruby swords, and a ruby helmet, make it fast like a pouncer dead, and its damage levels are very high, its health levels are the same as a golden speartons, you need to make a level for it to unlock it, put it in before no mans land, its cost is 1000, its space in the stick amount is 4, the final unit I want you to add is the shadowwrath from stick empires, make its speed and health the same like in stick empires, its cost is 450, and how much space it takes is 2, now for the thing I been waiting for yall to add... DAILY MISSIONS, if you complete one of the missions, you get gems, skins or special units, now for the finale, summon your very own wave of tamed zombies! I wanted some actual gameplay with zombie so please add this as a item for the shop, it's cost: 500 like the elite, that is all for today, I hope you do this max games studios! I used to love playing this game when it used to be a flash game on pc. Tho its been ages since i last played it since i dont have a pc anymore, but now that its a mobile game ive finally gotten to try it out and its super fun, just as fun as i remember and maybe better only issue is once u get to the final level "the last stand" or pretty much any other game mode in this game except unless undead. Its become nearly impossible to do anything without maxing out ur army and without any skins. On top of that everything costs so much gems and u only get 5 each whenever u earn it (not including chests) so im struggling to finish any normal difficulty challenges (which feel like its on hard difficulty), normal difficulty tournaments which ngl kinda feels like playing with players which is somewhat nice, and even normal difficulty campaign which i barely managed to make it to the final level but when i did i cant seem to get past the final level because even with the skins from campaign if i dont place the skill points in the right place ive basically screwed myself over. Which isnt a good idea. You should ease the player in a slight more til they max out their stats then throw everything u got at them and they should be able to survive even with all their skins on classic skins. Idk if you guys are still working on this game or not but if so hopefully u see this and figure out how to fix it.
